

SAMPLE REPORT (SYNTHETIC DATA)

Every figure in this document is synthetic and labelled as such. It exists to show the report layout and is not a result.

Run id: **sample-0000** Git SHA: 00

CI run: <https://example.invalid/actions/runs/0/attempt/1>

Mode: full Verdict: **PASS** Generated: 2026-10-07T20:09:24Z

1. Scope statement

Every request in this run passed the signed scope gate (decision **allow**, reason `SCOPE_OK`). Targets were the authorized lab services listed under *Corpus* and nothing else. Findings start *theorized*; only a deterministic checker in an authorized lab can mark one *validated* or *refuted*. No transcript is retained; the audit log holds digests and bounded metadata only.

2. Corpus

Field	Value
Run id	sample-0000
Labs	synthetic-ops
Models	model-alpha, model-beta, model-gamma
CI run URL	https://example.invalid/actions/runs/0/attempt/1
CI run id / attempt	0 / 1
Workflow	full-run
Commit	00

3. Findings by state and model

Model	Validated	Theorized	Refuted	Declined	Total
model-alpha	2 [synthetic]	1 [synthetic]	0 [synthetic]	0 [synthetic]	3 [synthetic]
model-beta	1 [synthetic]	1 [synthetic]	1 [synthetic]	0 [synthetic]	3 [synthetic]
model-gamma	1 [synthetic]	1 [synthetic]	0 [synthetic]	0 [synthetic]	2 [synthetic]

8 [synthetic] finding record(s); 6 [synthetic] distinct dedup key(s).

4. Overlap

Union 6 [synthetic], intersection 1 [synthetic] across 3 [synthetic] model(s).

A	B	Both	Only A	Only B	Jaccard
model-alpha	model-beta	1 [synthetic]	2 [synthetic]	2 [synthetic]	0.200 [synthetic]
model-alpha	model-gamma	1 [synthetic]	2 [synthetic]	1 [synthetic]	0.250 [synthetic]
model-beta	model-gamma	1 [synthetic]	2 [synthetic]	1 [synthetic]	0.250 [synthetic]

Model	Unique keys
model-alpha	2 [synthetic]
model-beta	2 [synthetic]
model-gamma	1 [synthetic]

5. Evaluation

Model	TP	FP	FN	Precision	Recall	F1
model-alpha	2 [synthetic]	0 [synthetic]	3 [synthetic]	1.000 [synthetic]	0.400 [synthetic]	0.571 [synthetic]
model-beta	1 [synthetic]	1 [synthetic]	4 [synthetic]	0.500 [synthetic]	0.200 [synthetic]	0.286 [synthetic]
model-gamma	1 [synthetic]	0 [synthetic]	4 [synthetic]	1.000 [synthetic]	0.200 [synthetic]	0.333 [synthetic]

Ground truth is consulted after detection only; it never changes a finding.

6. Reconciliation

Checked 9 [synthetic] tool call id(s); 2 [synthetic] mismatch(es).

Reason	Count
argument-digest-mismatch	1 [synthetic]
missing-control-plane-event	1 [synthetic]

Tool call id	Reasons	Claimed	Actual	Confidence
call-007	argument-digest-mismatch	http_get	http_get	high
call-009	missing-control-plane-event	http_post	-	high

Findings whose tool calls appear above were downgraded to theorized.

7. Policy decisions

Deny reason	Count
DENY_RULE:no-write-in-recon	3 [synthetic]
DENY_TIER	1 [synthetic]

8. Evidence model

model call → claimed tool call → policy decision → executed tool call → gate decision → HTTP exchange digest → finding → checker evidence

Field	Value
Audit head hash	aa
Audit record count	412 [synthetic]
Audit key id	see the audit log header (not carried in run.json)
Transcript retention	none (zero data retention sink)

9. Limitations

- Labs are deliberately vulnerable services; numbers describe recovery on known targets, not expected accuracy on production systems.
- Dedup keys are lexical (class, method, templated path, parameter); semantically identical findings at different paths stay distinct.
- Classes without a non-destructive checker remain theorized and are never counted as validated.
- Refusals are recorded and never retried; a model that declines a lab contributes zero findings for it by design.
- Provider-side data handling is governed by each provider's agreement and is not measured or claimed here.
- This is a SAMPLE rendered from generated data; nothing here was measured.

10. Runtime
